PROFILE

Mobile Software Engineer specializing in Flutter, with experience in building reliable and scalable applications. Focused on performance optimization, API integration, and real-world system behavior. Experienced across the full software development lifecycle, from development to deployment and production support.

WORK EXPERIENCE

IT Specialist; iFAST Global Hub AI Sdn. Bhd. — July 2024 - Present

- Optimized application performance and responsiveness, improving user experience through efficient data handling and UI rendering.
- Designed and implemented a frontend idempotency layer, ensuring transaction consistency and preventing duplicate submissions.
- Designed, developed, and maintained mobile applications using Flutter, contributing across the full software development lifecycle (development, testing, deployment, and support).
- Integrated with server-side APIs to support real-time data flows and ensure reliable application behavior.
- Built monitoring and alerting mechanisms to detect performance degradation, improving issue detection and reducing the time required to resolve production issues.
- Supported SIT, regression testing, and production releases, ensuring system stability during high-traffic periods.
- Leveraged AI-assisted development tools to improve development efficiency and code quality.

Intern, IT Partnership; iFast Service Centre Sdn. Bhd. — February 2023 - August 2023

- Contributed to frontend development including bug fixes, feature implementation, and UI improvements.
- Collaborated with cross-functional teams to deliver integrated and user-focused solutions.

PROJECT OVERVIEW

Stock View - Final Year Project | VueJS, Python, MySQL

- Developed a web application using VueJS, Python, and MySQL for screening Bursa Malaysia stocks using customizable technical indicators, enabling users to filter stocks efficiently based on defined criteria.

SKILLS

Languages & Frameworks

- Dart, Flutter

Core Strengths

- Performance Optimization, System Reliability, Mobile Application Architecture, API Integration

Tools & Technologies

- Git, Sentry, REST APIs, AI-assisted Development Tools

ACHIEVEMENT

- NASA Space Apps Sarawak 2023 - Champion (Senior Category)
- CodeNection Hackathon 2022 - 3rd Runner Up

EDUCATION

Bachelor of Computer Science (Software Engineering)

University Malaysia Sarawak | 2020 - 2024

CGPA: 3.90 / 4.00 (Dean's List for 6 semesters)
